## **DIT-MCO Receives ISO Certification**

**Kansas City, MO (February, 1998)**—DIT-MCO International Corporation, an international test equipment supplier, announced that National Technical Systems – Certification Services (NTS-CS), an independent registration body, certified DIT-MCO to ISO 9001.

Processes audited included:

- Product Design
- Product Development
- Production
- Installation
- Service

Phillip Thatcher, Quality Assurance Manager, pointed out that “although difficult crossroads still lay ahead, DIT-MCO is well on its way in being recognized as a company with a high quality management philosophy and a commitment to continually improve its quality processes.”

He added, “DIT-MCO used ISO to re-engineer product development, manufacturing, training, and customer support processes. Continued ISO certification mandates that DIT-MCO continually strives to improve its quality processes.”

With 117 ISO audits scheduled over the next three years, DIT-MCO commits to using a structured documented system to accomplish goals and objectives (i.e., ISO 9001). DIT-MCO strives to achieve excellence, performing all tasks with a dedication to quality while continuously striving to meet or exceed customer expectations in the manufacture of standard and custom test equipment. Each DIT-MCO employee has the responsibility of quality,

#####

continuous improvement and corrective action to improve all processes, methods, operations, etc. that will help in meeting or exceeding your requirements.
